PLEASE NOTE

Seating is limited and registration cannot be processed without payment.

COURSE DESCRIPTION

The lab session includes hands on training for residential air conditioning systems. The participants will work on a number of different air conditioning systems and will learn how to safely use gauge sets, recovery machines and vacuum pumps. The main topics include:

- Measurements of system parameters including superheat and sub-cooling
- Refrigerant charging and recovery
- Nitrogen purging and evacuation

THE LAB SESSION WILL RUN FOR ONE DAY ONLY ON JULY 12. YOU MUST HAVE TAKEN AIR CONDITIONING THEORY TO REGISTER IN THIS COURSE.

THE PRESENTER

Greg Scrivener has worked in the refrigeration and air conditioning industry for more than 15 years. He has experience in almost all aspects of the design, construction, operation and maintenance of commercial and industrial refrigeration systems. Greg is currently providing the industry with specialized refrigeration consulting services that focus on energy and capital spending management and advanced troubleshooting. He is also facilitating the training of many HVAC/R topics for owners, contractors, industry groups and governments.

Greg graduated from the University of Saskatchewan with a B.Sc. in Mechanical Engineering and is a Journeyperson Refrigeration Mechanic. He currently sits on a number of ASHRAE Technical Committees and is very involved in the development of refrigeration system safety standards as an active member of the ASHRAE Standard 15 committee.

CONTINUOUS TRAINING CERTIFIED PROGRAM

This program is an opportunity to have your company recognized as a leader in Continuous Training to your customers and within the industry. All training qualifies (except Journey Person training). Contact JoAnne at MCAS for more details.
